

MUHAMMAD WASEEM

Frontend Web Developer

About Me

I'm a Frontend Web Developer who loves turning designs into real, cool websites. I use HTML, CSS, JavaScript, and the magic of ReactJS to make everything work smoothly. Whether it's making websites look great on any device or adding fun interactive parts, I'm all about making web experiences awesome. Let's team up to bring your digital ideas to life!

Experience

Frontend Web Developer (intern)

NCCS at NED- Karachi

02/2023 - 03/2023

My responsibilities included ensuring the responsive design of websites, and making sure they look and work well on different devices such as desktops, tablets, and smartphones. I also played a key role in optimizing the user experience by improving website navigation, accessibility, and performance.

Education

NED University Karachi

BS Computer Science & Information Technology
2019-2023

Intermediate

Govt Boys degree college Aliabad Hunza
2017-2019

Projects

Design and Implementation of an automated Customized Class Timetable

(Html, CSS, and javascript for front end & Strapi and Node.js for backend)
11/2022 - 07/2023

Honey Company database management system

((used MySQL and SQL as databases)
